## Euclidean Geometry revisited

### Prof. Nitin Nitsure

Nitin Nitsure has been a faculty member at TIFR, Mumbai. He has made highly significant contributions to moduli problems in algebraic geometry, which are internationally recognized. He was awarded the ICTP prize in 1997. He is a Fellow of INSA and also of Indian Academy of Sciences.

Nitin Nitsure is an algebraic geometer, but has wide interests spanning physics, computer science and biology. He is well recognized as a speaker and has given a large number of public talks on a variety of subjects, in addition to numerous regular lecture courses.

**26 July 2022 at 4.30pm (AG-69)**

Euclidean Geometry is the play that is enacted on the stage of Euclidean space. This is an age-old subject of fascination to mathematicians. A whole lot of ancient and modern mathematics came out of it. In this talk, we will look at this ancient subject again, in the light of mathematical concepts and techniques from the last hundred years.
